DETAILED ACTION

Allowable Subject Matter

Claims 1-13 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art taken alone or in combination fails to anticipate or fairly suggest the limitations of the claims, in such a manner that a rejection under 35 USC 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 11 and 13.

Specifically regarding claims 1, 11 and 13, Inoue et al. (5430375) teaches the state of the art of a position detecting method or a position detecting apparatus.

But, Inoue fails to explicitly teach a phase converting unit that generates a plurality of phase converted signals, from the plurality of position detecting signals, which have different phases respectively by giving each predetermined phase difference to the plurality of position detecting signals; a first calculating unit; a second calculating unit that obtains second position data corresponding to a position of the object on the basis of the plurality of phase converted signals generated by the phase converting unit; and a third calculating unit that obtains a position of the object on the basis of the first and second position data , as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
